

Mr. WILSON of South Carolina. Mr. Speaker, today the House will begin consideration of the Regulations from the Executive in Need of Scrutiny Act of 2011, also referred to as the REINS Act. This bill will require Congress to approve any Federal regulation that will impact our economy by \$100 million or more.

The Small Business Administration estimates that regulations are costing our Nation's citizens \$1.75 trillion per year. The current administration's report on Federal regulations listed over 4,200 under development since last December and over 200 additional regulations proposed this year, costing consumers billions of dollars, destroying jobs. This fact is another example of how out of touch the President is with the hardworking and deserving American families. It is time for Congress to take action and stop the imposition of these job-killing policies that discourage small businesses from growing and expanding.

In conclusion, God bless our troops, and we will never forget September the 11th in the global war on terrorism.

FACTS ARE STUBBORN THINGS

(Mr. COURTNEY asked and was given permission to address the House for 1 minute.)

Mr. COURTNEY. Mr. Speaker, America's third President, John Adams, once said, "Facts are stubborn things; and whatever may be our wishes, our inclinations, or the dictates of our passion, they cannot alter the state of facts and evidence."

Well, Mr. Speaker, the facts now show that the health care reform law is working for America's seniors. This morning, CMS released figures that show that 2.7 million seniors saved \$1.2 billion in 2011 with lower prescription drug costs because the health care reform law is closing the prescription drug doughnut hole; 28,500 in Connecticut, 5,560 in my district, the Second Congressional District. The report also shows that 24 million seniors have used the annual checkup that the health care reform law now provides free of charge, a smarter, more intelligent way to pick up disease and illness for our elderly.

As President Adams once said, "Facts are stubborn things," and the facts show the health care reform law is working for America's seniors.

THOMAS EDISON'S LIGHT BULB—OUTLAWED

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Mr. Speaker, freedom of choice is under attack by Washington. The government wants to control the light in homes and businesses throughout America. A new law bans the incandescent light bulb and will re-

quire Americans to buy the new, special \$3 government-approved light bulb. Soon it will be against the law to sell Thomas Edison's incandescent light bulb—the symbol of American innovation.

This kind of government intrusion in our lives has left many Americans in the dark about what's next, and the government invasion into our lives is only increasing. Since the Federal Government has taken the power to choose away from Americans, people are flocking to their local Wal-Marts to hoard the last of the incandescent light bulbs.

Government controls so much of our lives in the name that government is smarter than we are; but for now, it's turn out the lights—the party's over for Thomas Edison's incandescent light bulb.

And that's just the way it is.

VOTER SUPPRESSION

(Mr. HOLT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOLT. Mr. Speaker, the national move to interfere with the voting rights of eligible citizens is deliberate. In 2011 the number of States requiring strict forms of government-issued IDs has nearly quadrupled. Why the sudden increase?

Proponents claim that voter fraud is the driving force; yet there is no evidence of this kind of deception. What do they think? That there are droves of people sneaking across the southern border so they can vote or that there are 15-year-olds trying to sneak into voting booths, and so we've got to card them? This is simply discrimination masquerading as orderly government.

The Brennan Center for Justice estimates that one in 10 eligible registered voters does not have the forms of ID that are acceptable under these expanding State laws. We can't stand by and let big money and special interests manipulate the results of elections by enacting 21st-century poll taxes. Poll taxes were thrown out decades ago as discrimination and contrary to processes.

SAFEGUARD MISSILE DEFENSE TECHNOLOGIES

(Mr. BROOKS asked and was given permission to address the House for 1 minute.)

Mr. BROOKS. Mr. Speaker, during the House Armed Services Committee's review of the National Defense Authorization Act, or NDAA, I successfully proposed a two-tier amendment to protect America's missile defense technology.

Tier 1 bars the White House from giving the Russian Federation any American hit-to-kill or other sensitive missile defense technology. Tier 2 bars the White House from giving Russia any American non-sensitive missile defense

technology unless the White House first certifies to Congress that America's missile defense will not be undermined and that our technology will not be proliferated.

Senator MARK KIRK of Illinois is blocking the Russian ambassador nomination until the appropriate safeguards exist that protect America's missile defense technology. I applaud Senator KIRK's efforts.

The NDAA is now in conference committee. I urge the conferees to support the HASC amendment and to safeguard missile defense technologies that have cost American taxpayers so much and that have helped protect America so well.

HONORING UNIVERSITY OF TENNESSEE LADY VOLBS BASKETBALL COACH, PAT SUMMITT

(Mr. FLEISCHMANN asked and was given permission to address the House for 1 minute.)

Mr. FLEISCHMANN. Mr. Speaker, today I rise to recognize not only one of the greatest coaches of all time but also one of the greatest people of all time, the University of Tennessee Lady Vols basketball coach, Pat Summitt.

Yesterday, Coach Summitt was named Sports Illustrated's Sportswoman of the Year, and there was no one more deserving than she. Not only is she the all-time winningest coach in NCAA basketball history, having well over 1,000 wins, including 16 SEC titles and eight national championships, but she is also an exemplary role model for the students she coaches and is a shining ambassador for the university she represents.

Earlier this year, Coach Summitt was diagnosed with early onset dementia, Alzheimer's type. While the news would be unbearable for many to take at such a young age, Coach Summitt has stayed on the sidelines and continues to coach the Lady Vols. She is, again, leading by example and is showing her players that, while life is full of obstacles, you can continue to achieve success through hard work and dedication.

Thank you, Coach Summitt. I am glad you represent my alma mater. Go Big Orange.

PROTECT THE MEDICARE PROGRAM

(Mr. BUCSHON asked and was given permission to address the House for 1 minute.)

Mr. BUCSHON. Mr. Speaker, as a cardiothoracic surgeon, I stand here today to voice my concern about the impending cuts to the Medicare program. I implore the Congress to craft a multiyear fix to the SGR—ideally, a permanent fix. This is a real threat to seniors across the country. Each year, the Congress continues to play politics with seniors' access to quality care. This must end.

Seniors, some of our most vulnerable citizens, may not be able to see the
